

Project Number: 2017-1-LT01-KA201-035235

**U.S.A.M.V. Iasi Open Days - The Congress "Life sciences, a challenge
for the future"
Iasi, Romania
18 – 19 October 2008**

Minutes

Hosted by the University of Agricultural Sciences and Veterinary Medicine of Iași, during 18-19.10.2018, in Iasi, Romania.

OFFBOOK project has been accepted with a presentation in plenary and publication of an article with the title New educational strands through the OFF BOOK project's "Theatrical Laboratories".

Abstract

The article draws on innovative ideas promoted by the European OFF BOOK project (Programme: Erasmus+/2017-1-LT01-KA201-035235) as it has been implemented by the EuroEd Foundation in Iasi. The project is being developed by a partnership from six European countries: Bulgaria, Greece, Latvia, Lithuania, Romania and Slovakia. The paper focuses on drama techniques promoted by the project, meant to enhance students' language, social and civic competences with a view to improving students' communication skills, combating discrimination and exploiting the potential of a multicultural context to the full. The experiment carried out on students (studying medicine and oenology) familiarised them with the project's objectives, activities and main method, "Theatrical Laboratories," which aims at changing school systems patterns through theatrical means. The method offers teachers, professors and educators generous ideas enabling them to cope with the existing multicultural environment in their universities and develop students' competences in democratic citizenship.

Description:

The purpose of the 2018 congress is to promote the newest results of research, development and innovation that have been achieved in the diverse areas belonging to the life sciences field, and also to encourage the creation of some research poles of excellence in the field.

The Congress "Life sciences, a challenge for the future" is one of the occasions through which, together with us, researchers from different areas of the world may identify solutions that could contribute to the sustainable development.
